Attendance Policy

The process of education requires a regular continuity of instruction, classroom participation, learning experiences, and study in order to reach the goal of maximum educational benefits for each individual child. Regular contact of the students with one another in the classroom and their participation in instructional activities under the tutelage of a competent teacher are vital to this purpose. This is an established principle of education. The good that schools have to offer can only be presented to students who are in attendance. With continued emphasis regarding excellence in education, all parties involved in attendance can better strive for quality in the classroom. Attendance reflects a student's dependability and is a significant factor on the student's permanent record. Future employers are as much concerned about punctuality and dependability as they are about academic record. School success, scholarship, and job opportunity are greatly affected by a good attendance record.

The goals of this policy are to (1) empower students to have successful learning opportunity; (2) reduce classroom disruption, non-attendance, and other factors that inhibit teacher effectiveness and learning opportunities; (3) provide structure for attendance requirements; and (4) improve parental communication and support to promote student academic success.
